Report Period: Sept 11-Oct 24

Summary of Progress in this Period

We have gone over a small test of a premade AI model with Keras on the free Google Collab platform, but it is very limited the amount we can train for free. We met with our new advisor and are waiting to hear back once he consults with Prof. Gaffar on what unlimited platform he planned for us to run the model on and what data we will be training it with.

Pending Issues

We can't do much right now without a data set to train with or a platform, but Khokhar said he will get back to us hopefully in the next few days.

Plans for Upcoming Reporting Period

Assuming we get the data set and platform we will choose an appropriate AI model from Keras, get it set up on the platform, and start doing some training on the data set.
