Report Period: Sept 25-Oct 8

### **Summary of Progress in this Period**

We have heard from Professor Khokhar that he has gotten our data from the medical institutions. Now we need to select a model from Keras to use and modify for our purposes. We have also decided that 6 hidden layers and 10 epochs for our AI should be sufficient.

---

### **Pending Issues**

We need the link to the data Professor Khokhar has. We also were mistaken about the type of information we would be analyzing and so we will need to deselect the base model from keras.

---

### **Plans for Upcoming Reporting Period**

Once we get the data from Professor Khokhar we can begin modifying it and separating it into the training and testing data sets.
